YAMANA TORU(54) METHOD OF CONFIRMING INVISIBLE
CORNER OF VEHICLE

COPYRIGHT: (C)1980,JPO&Japio

(57) Abstract:

PURPOSE: To reduce the invisible corner in the vicinity of front wheels by providing an auxiliary mirror in the range of visible range of a side mirror and transferring the vicinity of the front wheel position collected via the auxiliary mirror to the side mirror.

CONSTITUTION: Convex auxiliary mirror 3 is rotatably attached slightly obliquely outwardly at the top of the vicinity of the rear pillar of a freight truck 1. When the auxiliary mirror 3 is thus provided, the fields 4, 4' caught in the vicinity of the front wheel collected via the mirror 3 is partly transferred to the side mirror 5 to thus cause the driver to confirm the image. Accordingly, it can confirm the vicinity of the front wheel which was invisible heretofore to thereby reduce the invisible range.
